

Resilient, Portable, Communications Kits

Convergent Network Products

Core™

PSI-30™

con-ver-gence

bringing voice, data and video together on one platform

in-ter-op-er-a-bil-i-ty

being able to conduct voice communications between any radio device

dy-nam-ic in-ter-op-er-a-bil-i-ty

the ability to communicate via voice, data and video across any network via any IP-based device, on the fly, in real time, when and where needed

F4W's communications kits provide full featured telephone systems and data networks anywhere in the world by simply plugging into any available network with access to the Internet. This could be cellular, satellite or traditional fixed infrastructure.

Our systems just work! It is that simple. When everything else has failed, F4W has the answer: you plug it in, turn it on and make a phone call. We have learned from thousands of real deployments that when complicated network systems fail, there must be a system that anyone can set up to make a phone call or get access to the Internet.

F4W has invented a new communications framework with this primary purpose, "make it simple enough for anyone to use." The first minutes after an incident are critical, you need a simple solution... that works!

Provides:

- ☑ a powerful, 802.11b/g access point.
- ☑ a full featured, PBX VoIP communications system.
- ☑ a persistent 1-8XX number.
- ☑ unlimited VoIP minutes for 3 years.
- ☑ all fees and VSAT services included for 3 years.
- ☑ a small, lightweight portable carrying case for easy mobility and setup.
- ☑ a simple, web-based configuration.
- ☑ connectivity to any available IP network (any Ethernet connection) without the need for configuration or setup.
- ☑ diverse power options.
- ☑ a DHS SAFECOM Program compliant wireless system.
- ☑ a key component in meeting the National Incident Management System (NIMS) compliance metrics.

Features & Benefits

- One persistent telephone number.
- Includes unlimited VSAT service and telephone minutes for 3 years.
- Works on any available wired or wireless network.
- Global Satellite connectivity optional (VSAT and BGAN).
- Full-featured PBX functionality:
 - Auto Attendant.
 - Call Conferencing.
 - Voice Mail for each line.
 - Call Forwarding and Queuing.
 - Parking and Transferring.
- Diverse power options.
- Global coverage.
- Secure communications.

System Components

PSI-30™ BGAN Bundle

- (1) 802.11b/g 54 Mbps Wireless Access Point
- (1) F4W VoIP Service
 - (1) DID (Direct Inward Dial) 1-8XX VoIP Line
 - (1) 36 months unlimited VoIP service
- (1) Desktop VoIP Phone
- (4) Wireless VoIP Handsets with phone chargers and power supply
- (1) BGAN System
- (3) Annual BGAN Terminal Fees
- (1) 100MB Data Plan

PSI-30™

Core™ 5 – 36 Network and Communications System

- Licensed for 5 users (concurrent data and/or voice)
- (1) 1U Rackmount Network and Communications System
- (1) 802.11b/g 54 Mbps Wireless Access Point
- (1) VoIP PBX
 - (1) 1-8XX VoIP line
 - (1) 36 months unlimited VoIP service

Core™ 50 – 36 Network and Communications System

- Licensed for 50 users (concurrent data and/or voice)
- (1) 1U Rackmount Network and Communications System
- (1) 802.11b/g 54 Mbps Wireless Access Point
- (1) VoIP PBX
 - (1) DID (Direct Inward Dial) 1-8XX VoIP Line
 - (1) 36 months unlimited VoIP service

Core™ 50 - 36 Auto Deploy VSAT Bundle

- Core 50 - 36 Network and Communications System
- (1) F4W Auto Deploy VSAT System
 - (1) 1.2M Auto Deploy Satellite Dish
 - (1) Auto Deploy Satellite Controller
 - (1) 4-watt BUC and LNB
 - (1) Remote Satellite Router
- (1) 128 Kbps * 128 Kbps "Always On" VSAT Service for 36 Months
